TRAINING PLAN-ONLINE EBT 2025-2026

Introduction

The Transition to Online EBT in the WIC Mosaic Solution is a major update for all MOSAIC Programs. To support the WIC Mosaic Online EBT project, the Verdtek User Adoption Team has created a targeted training plan built on the Verdtek AERA® methodology, focusing on awareness, engagement, readiness, and ongoing support. The plan incorporates collaboration with Vexcel, the Verdtek User Adoption Team, and MOSAIC Program stakeholders, to gather workflow assessments, leadership feedback, and recent updates; addressing the needs of clinic staff, WIC clinic leadership, state WIC staff, and IT teams. This training plan offers diverse training delivery formats including instructor-led sessions (both onsite and virtual), agendas and materials for end user and train-the-trainer sessions, user guides, quick sheets, recorded webinars, interactive digital materials, and supplemental resources such as knowledge base articles, learning paths, and microlearning videos. Through this blended approach, the training plan aims to build competence and confidence among users, ensuring all impacted groups are prepared for a successful and sustainable rollout of the Online EBT system.

Overview

The Training Plan for Online EBT for WIC Mosaic details evidence-based instructional design principles and strategies to guide the learning experience, ensuring alignment with the unique needs of the MOSAIC Programs. This plan includes the structure and training delivery methodology for both onsite Instructor Led Trainings (ILT), and Virtual Instructor Led Trainings (VILT) sessions. It includes the curriculum and topics for Information Management and the new Online EBT functionality for Clinic Services and myWIC, as well as materials provided for end user and train-the-trainer sessions. Through these structures and multi-modal approaches, the Training Plan aims to build user competence and confidence, to ensure each Mosaic Program experiences a seamless and successful adoption of new Online EBT functionality for the WIC Mosaic solution.

Training Goals

The primary goals of the training initiative are to ensure that all members of the MOSAIC Programs are fully prepared to transition to Online EBT functionality within the WIC Mosaic solution and to foster user confidence in navigating new processes and technologies. The objectives of this training are threefold:

1. To provide end users with a comprehensive understanding of the new enhancements, features, and workflow processes introduced by the Online EBT implementation.
2. To equip various user groups—including front-line clinic staff, administrators, and technical support teams—with practical skills through targeted, role-based training.
3. To support ongoing user adoption by offering continuous access to resources such as user guides, quick reference materials, knowledge base articles and microlearning videos.

By systematically addressing identified training needs, incorporating feedback from stakeholders, and utilizing a blend of virtual, onsite, and self-paced learning modalities, the training initiative aims to achieve sustained competency, promote readiness across the MOSAIC Programs, and ensure a seamless adoption experience for all users involved.

Training Objectives

To ensure the successful adoption of the Online EBT system, the following training objectives have been established. These objectives are designed to address the diverse needs of the MOSAIC Programs, equipping all participants with the skills, knowledge, and resources necessary to confidently transition to and excel within the new platform.

- Ensure all MOSAIC Program members are fully prepared to transition to Online EBT functionality within the WIC Mosaic solution.
- Foster user confidence in navigating new processes and technologies.
- Build user competence and readiness through a blend of virtual, onsite, and self-paced learning modalities.
- Incorporate feedback from stakeholders to systematically address identified training needs.
- Promote sustained competency and a seamless adoption experience for all users involved.

Training Delivery Methodologies

The Training Methodologies section outlines the instructional strategies that will guide our approach to building confidence and proficiency within the MOSAIC Program. Emphasizing a thoughtful blend of Instructor Led Training (ILT) and Virtual Instructor Led Training (VILT), this section details how each method leverages best practices in instructional design to maximize engagement, facilitate knowledge transfer, and provide practical, hands-on learning experiences tailored to the diverse roles within the organization.

Instructional Design for Instructor Led Training (ILT)

Onsite instructor-led training (ILT) serves as the foundation of our strategy for enhancing user proficiency and assurance within the MOSAIC Program. By delivering well organized, role-specific sessions to designated user groups, participants benefit from interactive, practical instruction facilitated by expert trainers and subject matter experts. This approach provides users with direct experience in new processes and technologies, alongside immediate access to tailored guidance and resources, supporting effective adoption of the new Online EBT system.

Foundations of the ILT Approach

- Targeted, Role-Based Training: ILT sessions are structured to address the specific roles and responsibilities of different user groups, such as clinic staff, clinic and regional administrators, state WIC staff, and technical support teams.
- Practical, Hands-On Learning: ILT emphasizes interactive, module-based instruction, allowing participants to engage directly with the new technology through guided exercises, time for practice, and real-world scenarios.
- Iterative Feedback: Stakeholder input is systematically incorporated to refine instructional content and address evolving training needs.

Structural Elements of the Onsite ILT Model – Designed for End Users

- Group Size and Facilitation: Each ILT group is highly recommended to be capped at a maximum of 25 participants to foster interaction and personalized support. Two trainers are assigned per group: one delivers the content modules, while the other provides just-in-time technical assistance, ensuring smooth transitions and immediate help when required. For larger groups, additional trainers may be assigned. The inclusion of additional participants will require mutual agreement from Vexcel, HHSC, and Verdtek.

- Subject Matter Expertise: At least one State WIC Program Subject Matter Expert (SME) is present to resolve policy or procedural questions in real time, supporting trainers and learners alike.
- Modular Curriculum: The curriculum consists of discrete modules targeting specific functionalities and workflows relevant to the user audience. Modules are sequenced logically, building from foundational concepts to advanced application.
- Blended Materials: Learners receive a suite of supporting resources—user guides, quick sheets, end-to-end process videos, and knowledge articles with accompanying videos inside the WIC Mosaic Support Portal available for ongoing reference.
- Make-up Sessions and Continued Learning: Post-training support includes make-up remote (onsite ILT not available) sessions for specific modules, and/or Open Office Hour sessions, or refresher webinars to be scheduled no later than 3-4 weeks post go-live dates. These sessions are designed to reinforce learning and support users' transition to independent practice.

The Train-the-Trainer (TtT) Model for Onsite ILT

- The Train-the-Trainer (TtT) Component: For programs opting for the train-the-trainer component, additional supplemental instructional resources/materials and guidance are designed to equip selected trainers with the skills and resources needed to deliver WIC training sessions directly to their program's end users. Each TtT session includes a comprehensive Instructor Guide that aligns with our trainer materials, ensuring consistency and clarity in content delivery. TtT session participants receive tailored coaching on effective facilitation strategies, curriculum sequencing, and troubleshooting common challenges. This approach empowers trainers to confidently lead sessions and support ongoing learning within their own organizations.

Instructional Design for Virtual Instructor Led Training (VILT)

Virtual Instructor Led Training (VILT) is designed to empower MOSAIC Programs with the skills and confidence needed to thrive in a digital landscape. By leveraging real-time, interactive online sessions tailored to specific roles, VILT enables learners to engage directly with new systems and processes from any location. Supported by expert

trainers and subject matter specialists, this approach fosters meaningful learning, adaptability, and a smooth transition to new technologies.

Foundations of the VILT Approach

- Targeted, Role-Based Training: VILT sessions are deliberately designed to address the unique responsibilities and workflows relevant to distinct user groups, including clinic staff, clinic and regional administrators, state WIC staff, and technical support teams. Participants are able to attend sessions based on their roles, ensuring content relevance and maximizing engagement.
- Engaging, Interactive Learning: VILT capitalizes on digital platforms' capabilities by integrating live demonstrations, guided walkthroughs, and interactive Q&A.
- Iterative Feedback: Stakeholder input is systematically incorporated to refine instructional content and address evolving training needs.

Structural Elements of the VILT Model

- Optimal Group Size and Facilitation: Each VILT cohort is limited to a maximum of 40 participants unless otherwise mutually agreed to preserve interactivity and individual attention. One trainer and up to two facilitators guide each session: one leads the delivery of content modules, while the other two manage technical support, monitors chat and provides real-time assistance to keep sessions running smoothly.
- Subject Matter Expertise: At least one State WIC Program Subject Matter Expert (SME) is present in every virtual session, ready to address policy and procedural queries as they arise, ensuring that both trainers and participants have up-to-date answers if possible. Note: Questions will be recorded and collected into an FAQ document after conclusion of the VILT session.
- Modular, Sequential Curriculum: The curriculum is structured into distinct, content-specific modules focused on core functionalities and user tasks. These modules are logically sequenced, beginning with foundational concepts and gradually progressing to advanced application.
- Blended Materials: Learners receive a suite of supporting resources—user guides, quick sheets, end-to-end process videos, and knowledge articles with accompanying videos inside the WIC Mosaic Support Portal available for ongoing reference.
- Platform and Technology: VILT is delivered via Microsoft Teams – Webinar. Prior to training, participants are provided with access and links with instructions,

module descriptions, links for digital resources, and support contacts to ensure seamless connectivity.

- Make-up Sessions and Continued Learning: Post-training support includes make-up remote sessions for specific modules, and/or Open Office Hour sessions, or refresher webinars to be scheduled no later than 3-4 weeks post go-live dates. These sessions are designed to reinforce learning and support users' transition to independent practice.

Best Practices for Virtual Engagement

- Active Participation: Sessions include frequent opportunities for learners to interact, such as possible participation with polls, collaboration through breakout groups and sharing feedback via chat or audio. Facilitators foster an inclusive atmosphere where every participant is encouraged to contribute.
- Just-in-Time Support: A dedicated facilitator remains available throughout the session to resolve technical issues, answer questions, and provide individualized assistance when possible, minimizing disruption and maximizing learning continuity.
- Recording and Replay: All VILT sessions are recorded and made available for later viewing, allowing participants to revisit material at their convenience.
- By combining structured, role-specific content with dynamic digital tools and expert guidance, the VILT model ensures that all members of the MOSAIC Programs achieve lasting proficiency and confidence, regardless of location.

The Train-the-Trainer Model for Remote VILT

The Train-the-Trainer (TtT) Component: For programs opting for the train-the-trainer component, additional supplemental instructional resources/materials and guidance are designed to equip selected trainers with the skills and resources needed to deliver WIC training sessions directly to their program's end users. Each TtT session includes a comprehensive Instructor Guide that aligns with our trainer materials, ensuring consistency and clarity in content delivery. TtT session participants receive tailored coaching on effective facilitation strategies, curriculum sequencing, and troubleshooting common challenges. This approach empowers trainers to confidently lead sessions and support ongoing learning within their own organizations.

Training Curriculum

Curriculum for the Information Management Application

The Information Management Training curriculum is designed specifically for users of the WIC Mosaic Information Management System (MIS). This Training serves as an essential resource for anyone who will be working within the WIC Mosaic Information Management application, and provides detailed instructions, process overviews, and comprehensive guidance on Food and Vendor Management, Vendor Portal, Financial Management, Reports, and Master Data Administration. This also includes the recent updates to Drop Ship for Online EBT. Updates include: Status Display, Vendor Management Configurations and enhanced visibility and notifications. These changes are designed to improve vendor and state level experience without impacting clinic staff workflows.

Key Training Modules:

- General Navigation & Overview – Designed for users new to WIC Mosaic.
- Food Management
    - Includes Cost Containment Pre-Payment
    - Includes USDA Food Package Updates
- Vendor Management
    - Includes FDP
    - Includes Cost Containment Post-Payment (if applicable)
    - Includes Drop Ship - OEBT new functionality (if applicable)
- Vendor Portal
    - Includes Drop Ship - OEBT new functionality (if applicable)
- LEBs (Texas only)
- Rebate Management
- Reports

General Navigation and Overview of the Information Management Application	
This module is intended for end users who are new to the WIC Mosaic Solution and therefore would benefit from a general navigation and overview of the system. This curriculum shall be delivered in a recorded webinar format and should be completed by any user new to the WIC Mosaic Information Management application.	
Training Topics	
Overview	Naming conventions and Icons from the user guide
	Application
	Navigation Bar
	Work Area Selector
	Site Map
	Action Toolbar
	Dashboards
Home/Recent/Pinned	How to use the Home Button
	Pinning from the Recent
Changing the Default View	Changing a Default View
	Saving the Default View
	Sharing a View
Sorting, filtering and adding columns	Sorting in the View
	Filtering in a View
	Adding Columns

Food Management	
The Food Management section covers the management of food categories and sub-categories, UPCs, peer groups, and cost containment pre-payment settings related to WIC Mosaic MIS. Also covered in this module as an optional topic are updates related to users who are responsible for completing food package updates based on changes associated with new USDA changes.	
Training Topics	
Intro and Access	Intro to Food Management
	Security Roles and Access Overview
Food Categories & Sub-Categories	How to Create a Food Category
	Create a Food Category
	Create a Food Sub-Category
	Process a Food Category Record for Approval
	Update an Existing Food Category
	Add a Food Sub-Category to an Existing Food Category
	Update End Date for a Food Sub-Category

UPC Record	Process a UPC Record for Approval
	Create a UPC
	Update End Date for a UPC
	Update an Existing UPC
Peer Group	Create a Peer Group Record
Cost Containment Pre-Payment	Create Cost-Containment Pre-Payment Settings
	Cost Containment Pre-Payment Runs
	Cost Containment Pre-Payment Output Masters
	Add Food Item Exclusions to CC Post Payment Settings
	Add Vendor Exclusions to CC Post Payment Settings
	Overriding NTEs
USDA Food Package Updates	Brief update on how OEBT project impacts current processes for updating food items for participant food packages. This topic examines recent and upcoming changes to USDA food regulations that directly impact program operations, vendor compliance, and participant eligibility.
Reports	Reports are available for this module, providing insights and analytics across food management and includes: • FM - EBT Redemption vs Non-Redemption • Redeemed UPC PLU Details • Approaching NTE

Vendor Management	
Vendor Management is a core module in Mosaic MIS, serving as the system of record for all vendor data, applications, contracts, compliance, and reporting.	
Training Topics	
Intro and Access	Intro to Vendor Management
	Security Roles and Access Overview
Corporate and Business Entities	Managing Corporate Business Entities and Vendors
	Create a Corporate Business Entity
	Create a Business Contact
	Create a Business Contact Relationship
Vendors/FDP	Create a Vendor
	Create a Vendor Violation
	Document a Vendor Sanction
	Document a Vendor Disqualification
	Document Vendor Fines and Claims
	Document Vendor Appeals
Business Contacts	Create a Business Contact
	Create a Business Contact Relationship
Contracts	Create a Contract

Farmers Market Members	Create a Farmers Market Member
High Risk Reasons	Create a High Risk Reason
Cost Containment Post-Payment	Create CC Post Payment Settings
	Add Food Item Exclusions to CC Post Payment Settings
	Add Vendor Exclusions to CC Post Payment Settings
	Perform a CC Post Payment Run
	Create a Compliance Activity
Compliance Activities/FDP	Create a Compliance Letter
	Create a Compliance Visit
Applications	Pre-Screening
	Applications & Contracts
	Process Pre-Screening for Approval
	Process a Corporate Business Ent Application for Approval
	Process a Vendor Application for Approval
Drop Ship OEBT Updates	Create a Drop Ship Contact
	Update a Vendor to a Drop Ship Vendor
Reports	Reports are available for this module, providing insights and analytics across vendor management and includes: • EBT Redemption vs Non-Redemption • Participant Access • Primary Corporate Contact Query • Annual FDP Report

Vendor Portal	
This training introduces the Vendor Portal and Rebate Management systems, guiding participants through vendor registration, reporting, dashboards, application processes, and renewals, alongside comprehensive coverage of rebate management	
Training Topics	
Intro and Access	Intro to Vendor Portal
	Security Roles and Access Overview
Vendor Portal	Vendor Portal Registration
Drop Ship OEBT Updates	Acknowledge a Drop Ship Order
	Reject a Drop Ship Order
	Ship a Drop Ship Order
Reports	Vendor Reports
Vendor Dashboards	Vendor Dashboards
	Pre-Screening (vendor-facing)

Applications	Applications (vendor-facing)
	Renewals (vendor-facing)

LEBs (Texas only)	
This module provides a comprehensive overview of managing Least Expensive Brands (LEB) within Mosaic and will cover step-by-step processes for creating and handling LEBs, associating LEBs with applications, cloning, and submitting for approval.	
Training Topics	
Intro and Access	Intro to Vendor Portal
	Security Roles and Access Overview
LEB Creation	How to Create an LEB
	How to Create an LEB UPC
	How to Create a Vendor LEB
LEB Activities	How to Associate an LEB to an Application
	How to Clone an LEB
	How to Submit an LEB for Approval
	How to Approve an LEB
Reports	LEB Reports
LEB Dashboards	LEB Dashboards

Rebate Management	
The Rebate Management module oversees rebate manufacturers, contracts, invoices, payments, and adjustments.	
Training Topics	
Intro and Access	Intro to Rebate Management
	Security Roles and Access Overview
Rebate Management	Create a Rebate Manufacturer
	Create a Rebate Manufacturer Contract
	Add Rebate Contract Sub Cats
	Add Rebate Contract UPCs
	Create a Rebate Invoice
	Create a Rebate Payment
	Create a Rebate Adjustment
	Regenerate or Void an Invoice
	Generate an Invoice Summary Report
	Generate an Invoice Detail Report

Reports	Generate an Invoice Summary Report
	Generate an Invoice Detail Report
	Review Sub-Cat and UPC Reports
Dashboards	Overview of Dashboards and Views related to Rebate Management processes.

Curriculum for Clinic Services - Online EBT Project Application

The comprehensive training curriculum for the Online EBT Clinic Services Application is designed to provide an in-depth understanding of key operational areas essential for program success. Participants will explore the latest tools and procedures for issuing benefits through the Online Electronic Benefit Transfer (OEBT) system, including the nuances of issuance for both offline and online EBT benefits during their WIC program's brief transitional period. The curriculum also covers myWIC's individualized card issuance process for endorsers. By the end of modules 1 and 2, WIC clinic staff will be equipped with the knowledge and skills needed to navigate new workflows for benefit issuance functionality in their state WIC program's MIS WIC Mosaic solution.

Key Training Modules:

- Introduction and Terminology – Designed give users a tour of the New UI
- Foundations of Online EBT
    - Includes Benefit Issuances
    - Includes Card Management
    - Includes myWIC updates
- Transitioning from Offline to Online EBT
    - Includes Card Transition Period
    - Includes Benefit management during transition
    - Includes Transfers and Special Topics

The recent enhancements to Online EBT (OEBT) for Drop Ship functionality do not change the existing processes or workflows for clinic staff. Creating, releasing, and issuing drop ship orders will remain exactly as before. No additional training is required beyond a note on the following updates:

- **Status Display:** Statuses are now fully spelled out (unabbreviated) and will update in near real time.

The majority of improvements focus on vendor-side capabilities, including:

- **Vendor Management Configurations**: Ability to enable vendors for drop ship and grant access to the new drop ship dashboard in the Vendor Portal via Drop Ship contacts.

- **Enhanced Visibility & Notifications**: Vendors can view order statuses and receive notifications via email and the Vendor Portal when key actions occur

(e.g., order release, shipped, etc).

These changes are designed to improve vendor and state-level experience without impacting clinic staff workflows.

Module 1: Foundations of Online EBT	
This module explores all new features and enhancements of the Online EBT project that impact users of both the Mosaic CRM MIS for Clinic Staff and the myWIC mobile app for participants. This module is a prerequisite for Module 2: Transitioning from Offline to Online EBT.	
Training Topics	
Intro and Access	Introduction and Learning Objectives
	New UI and Navigation Tour
	Define New Online EBT Terminology
Electronic Benefits Account (EBA) Creation & Management	Electronic Benefits Account (EBA) Creation
	Mosaic UI & Workflows
	Online EBT Tab
	Freeze EBA/EBA Status Discussion
Card Management	Assigning a Card (Add Cardholder)
	Capture Cardholder Signature
	Replacing a Card
	Canceling a Card
	Refresh Card Status Button
	Card Statuses
Benefit Issuances	Creating, Modifying, Voiding & Loading Benefits
	Verifying Benefit Issuance
	Issuance Statuses
	Shopping List, Watermark Considerations, & Printing
	Errors, Troubleshooting, & Issuance Scenarios
	Knowledge Check and Q&A
Viewing Benefit Balances & Redemption History	Offline vs. Online Differences
	Viewing Benefit Balances
	Viewing Redemption History
	Troubleshooting & Errors
myWIC OEBT Updates	Overview of Impact of Online EBT Updates
	Real-time Benefit History and Redemption History
	Manage PIN

	Freeze/Unfreeze Card
	Cancel Card
	Request Mailed Card
	Updates to “Link Card” for New myWIC Users
Recap, Knowledge Checks, & Scenario-based Q&A	High-level session recap and overview of reference materials
	Targeted knowledge check and Q&A
	Facilitated open Q&A

Module 2: Transitioning from Offline to Online EBT	
After the user completes Module 1: Foundations of Online EBT, Module 2 will provide the user with practical application and instruction on issuing benefits for participants using both offline and online EBT cards through a brief period of transition before all participants are completely issued benefits through the new Online EBT system.	
Training Topics	
Intro and Access	Introduction and Learning Objectives
	New UI and Navigation Tour
	Define new Online EBT Terminology
Card Transition Period Overview	Defining the Card Transition Period
	Timeline: When does "offline" end and when does "online" begin?
	Impact to Clinic Staff Workflows and Participants
	Create a myWIC Account
Benefit Management During Transition	Issuing Benefits to Both Offline and Online Systems
	Live Scenarios
	Shopping List – Printing and Identifying "Offline" vs. "Online"
	Issuance Statuses and Verifying Redemptions
	Targeted Q&A
Card Operations During the Transition Period	Assigning, Replacing, and Canceling Cards for Both Systems.
	Searching Family Records by Card Type
	Troubleshooting Scenarios
	Communicating Card Changes to Participants
Transfers and Special Topics	Offline vs. Online Transfer Processes
	Foster Considerations
	Impact to Food Substitutions
	Inventory Changes
Recap, Knowledge Checks, & Scenario-based Q&A	High-level session recap and overview of reference materials
	Targeted knowledge check and Q&A
	Facilitated open Q&A

Training Delivery by State/ITO WIC Program

Cherokee WIC Training Plan Overview

The Cherokee WIC training plan is designed to ensure a smooth transition to the WIC Mosaic Online EBT system through comprehensive, in-person sessions to be held over 3 days, onsite, in Tahlequah, Oklahoma. These sessions provide clear, role-specific guidance tailored to the needs of each participant.

Training will be delivered face-to-face, allowing staff members to receive personalized instruction and direct support from the Verdtek User Adoption Training Team. The focus is on equipping attendees with the necessary knowledge and skills to perform their responsibilities confidently in the new system.

Training is scheduled for the weeks of January 26 and February 23, 2026, leading up to the system's go-live date on April 1, 2026. The curriculum is designed to meet the needs of state staff through the Information Management application, and both state and clinic staff through the Clinic Services – Online EBT functionality curriculum, ensuring a smooth transition to the new WIC Online EBT system.

Cherokee WIC Training Schedule & Curriculum

The following scheduled onsite sessions and curriculum are collaboratively designed by the Verdtek User Adoption Training Team and Cherokee WIC state staff to address the unique responsibilities and requirements of each group, allowing participants to engage face-to-face with subject matter experts and receive personalized guidance. By focusing on targeted instruction within a supportive, in-person environment, the program aims to maximize engagement, facilitate hands-on practice, and ensure every attendee leaves with the confidence and skills needed for a seamless transition to the new system.

The Cherokee WIC Training Schedule & Curriculum Details include:

- 3-Day Onsite Training Sessions (Release 1 and 2 items)
    - 01/28-01/30
- 3-Day Onsite Training Sessions (Release 2 items)
    - Week of 02/23/2026 TBD –
    - At this time, the Verdtek User Adoption team and Cherokee WIC state team will mutually determine and agree on if 3-day onsite training is required.
- Onsite in Tahlequah, OK
- 8:30am - 4:00pm
- Make-up/OOH sessions to be scheduled starting the week of 2/16/2026
- EBT Offline/Online Card Transition Period: 02/02/2026 – 03/31/2026

- Go-Live Date: April 1, 2026

Date	Day	Training Groups & Curriculum
1-28-26	1	Clinic Services – State and Clinic Staff (30 attendees) Modules:
		• Module 1: OEBT Features and Updates • Module 2: Transition from Offline to Online Benefit Issuance
1-29-26	2	Clinic Services –State and Clinic Staff (30 attendees) Modules: • Module 1: OEBT Features and Updates • Module 2: Transition from Offline to Online Benefit Issuance
1-30-26	3	Information Management – State Staff (up to 25 attendees) Modules: • Food Management • Vendor Management • Vendor Portal • Rebate Management

Louisiana WIC Training Plan Overview

The Louisiana WIC Program will implement a comprehensive training plan to support the transition to the new Online EBT (OEBT) system. Training will be delivered using a remote, Virtual Instructor-Led Training (VILT) format to maximize participation and minimize disruption to local operations. The plan features a two-tiered approach: State WIC Information Management staff will complete targeted end user VILT sessions, while selected state staff and WIC regional directors will participate in a specialized Train-the-Trainer (TtT) program focused on Clinic Services. These TtT participants will be responsible for cascading training to all WIC clinic staff statewide, ensuring that each team member is fully prepared for the OEBT rollout. By conducting all training sessions remotely, the Louisiana WIC Program can offer flexible scheduling and broad access for staff at all levels.

Louisiana WIC Training Schedule & Curriculum

The following scheduled sessions and curriculum are collaboratively designed by the Verdtek User Adoption Training Team and Louisiana WIC state staff to address the unique responsibilities and requirements of each group, enabling participants to benefit from remote, virtual instructor-led training delivery which offers greater flexibility, accessibility, and reduced disruption to daily operations compared to traditional onsite sessions.

Louisiana WIC state Clinic Services staff participating in the TtT program will be equipped with comprehensive Instructor Guides for each module, along with additional

training resources specifically designed to help them deliver consistent, high-quality instruction to clinic staff across all Louisiana WIC locations. This ensures that Clinic

Services staff are well-prepared to facilitate learning and maintain ongoing support for their teams throughout the transition to the Online EBT system.

The Louisiana WIC Training Schedule & Curriculum Details include:

- 11 Remote VILT Training Sessions
- Scheduled throughout the 2-week period 02/02/2026 - 02/13/2026
- End user VILT Training Sessions for Information Management – State staff
- Train-the-Trainer (TtT) Training Sessions for Clinic Services - State staff and regional directors
- Make-up/OOH sessions to be scheduled starting week of 3/16/2026
- EBT Offline/Online Card Transition Period: 03/02/2026 – 04/30/2026
- Go-Live Date: May 1, 2026

Date	Day	Training Groups
2-3-26	1	Information Management – State Staff (up to 25 attendees) Modules: • Food Management • Vendor Management • Vendor Portal • Rebate Management
2-4-26	2	Clinic Services – State Staff Module: • Module 1: OEBT Features and Updates
2-5-26	3	Clinic Services – State Staff Module: • Module 2: Transition from Offline to Online Benefit Issuance
2-10-26	4	Train-the-Trainer Clinic Services – State Staff and Regional Nutritionists Module: • Module 1: OEBT Features and Updates • Information Management – State Staff (10 Attendees) Modules: • Food Management • Rebate Management
2-11-26	5	Train-the-Trainer Clinic Services – State and Clinic Staff and Regional Nutritionists Module: • Module 2: Transition from Offline to Online Benefit Issuance

New Mexico ITOs WIC Training Plan Overview

The New Mexico ITOs WIC training plan is designed to ensure a smooth transition to the WIC Mosaic Online EBT system through comprehensive, in-person sessions to be held over 3 days, onsite, in Albuquerque, New Mexico, April 29-30, 2026. These sessions provide clear, role-specific guidance tailored to the needs of each participant.

Training will be delivered face-to-face, allowing staff members to receive personalized instruction and direct support from the Verdtek User Adoption Training Team. The focus is on equipping attendees with the necessary knowledge and skills to perform their responsibilities confidently in the new system.

Training is scheduled for the week of April 29-30, 2026, leading up to the system's go-live date on May 1, 2026. The curriculum is designed to meet the needs of all New Mexico ITOs WIC staff members by delivering trainings for both the Information Management application system and Clinic Services application's new Online EBT functionality, ensuring a smooth transition to the new WIC Online EBT system.

New Mexico ITOs WIC Training Schedule & Curriculum

The following scheduled onsite sessions and curriculum are collaboratively designed by the Verdtek User Adoption Training Team and New Mexico ITOs WIC staff to address the unique responsibilities and requirements of all WIC staff members, allowing participants to engage face-to-face with subject matter experts and receive personalized guidance. By focusing on targeted instruction within a supportive, in-person environment, the program aims to maximize engagement, facilitate hands-on practice, and ensure every attendee leaves with the confidence and skills needed for a seamless transition to the new system.

The New Mexico ITOs WIC Training Schedule & Curriculum Details include:

- 2 Full Day Training Sessions
- Onsite in Albuquerque, NM
- 8:30am - 4:00pm
- Make-up/OOH sessions to be scheduled starting the week of 05/11/2026
- EBT Offline/Online Card Transition Period: 05/01/2026 – 05/30/2026
- Go-Live Date: June 1, 2026

Date	Day	Training Groups
4-29-26	1	Information Management – State Staff and Clinic Staff (up to 50 attendees) Modules: • Food Management • Vendor Management • Vendor Portal • Rebate Management
4-30-26	2	Clinic Services – State Staff and Clinic Staff (50 attendees) Modules: • Module 1: OEBT Features and Updates • Module 2: Transition from Offline to Online Benefit Issuance

New Mexico WIC Training Plan Overview

The New Mexico WIC Program will implement a comprehensive training plan to support the transition to the new Online EBT (OEBT) system. Training will be delivered using both onsite Instructor-Led Training (ILT) and remote, Virtual Instructor-Led Training (VILT) session formats to maximize participation and engagement. This plan begins with a 3-day onsite training in Santa Fe, New Mexico, focused on end user training for state staff using the Information Management curriculum. Days 2 and 3 continue with state staff, and clinic staff utilizing the Train-the-Trainer (TtT) model to introduce new Online EBT functionality for Clinic Staff. The TtT Clinic Staff training participants will be responsible for assisting at WIC clinic locations with clinic staff participating in remote VILT Clinic Services end user training session across the state. This approach helps to ensure that WIC clinic staff members participating in remote VILT training sessions are fully prepared for the Online EBT rollout. By conducting these training sessions remotely, the New Mexico WIC Program can offer flexible scheduling and broad access for clinic staff learners at all levels.

New Mexico WIC Training Schedule & Curriculum

The following scheduled onsite ILT and remote VILT sessions and curriculum are collaboratively designed by the Verdtek User Adoption Training Team and New Mexico WIC state staff to address the unique responsibilities and requirements of each group, allowing many WIC Clinic Staff participants to engage face-to-face with embedded in clinic super users and subject matter experts and receive personalized guidance during their remote training sessions.

New Mexico WIC state Clinic Services staff participating in the TtT program will be equipped with comprehensive Instructor Guides for each module, along with additional training resources specifically designed to help them deliver consistent, high-quality

instruction to clinic staff within their assigned WIC clinic locations. This ensures that many identified high-need Clinic Services staff are well-prepared for the transition using new Online EBT system functionality.

The New Mexico WIC Training Schedule & Curriculum Details include:

- 3 Full Day Training Sessions
- Onsite 2-days in Santa Fe, NM and 1-day in Albuquerque, NM
    - End User Training: Information Management – State Staff
    - Train-the-Trainer (TtT) Training Model for State Staff
    - Train-the-Trainer (TtT) Training Model for Clinic Staff
- 15 VILT sessions for Clinic Staff (only 10 sessions necessary)
- Make-up/OOH sessions to be scheduled starting the week of 04/13/2026
- EBT Offline/Online Card Transition Period: 04/01/2026 – 06/30/2026
- Go-Live Date: July 1, 2026

(TBD – Scheduling in progress)

Week of 3/16/2026		VILT: Clinic Services – Clinic Staff (180 attendees) Modules: • Module 1: OEBT Features and Updates • Module 2 : Transition from Offline to Online Benefit Issuance

Texas WIC Training Plan Overview

The Texas WIC Program will implement a comprehensive training plan to support the transition to the new Online EBT (OEBT) system. Training will be delivered using a remote, Virtual Instructor-Led Training (VILT) format to maximize participation and minimize disruption to local operations. The plan features a two-tiered approach: State WIC Information Management staff will complete targeted end user VILT sessions, while WIC Clinic Staff will participate in end user remote, VILT sessions focused on Clinic Services – new Online EBT functionality for CRM and myWIC and transitioning from offline to online EBT processes. This plan aims to ensure that each team member is fully prepared for the Online EBT rollout. By conducting all training sessions remotely, the Texas WIC Program can offer flexible scheduling and broad access for staff at all levels.

Texas WIC Training Schedule & Curriculum

The following scheduled sessions and curriculum are collaboratively designed by the Verdtek User Adoption Training Team and Texas WIC state staff to address the unique responsibilities and requirements of each group, enabling participants to benefit from remote, virtual instructor-led training delivery which offers greater flexibility, accessibility, and reduced disruption to daily operations compared to traditional onsite sessions.

. The Texas WIC Training Schedule & Curriculum Details include:

- Up to 11 Remote VILT End User Sessions for Information Management topics
    - To Be Scheduled Weeks of 01/19/2026 – 02/02/2026
- Up to 190 VILT End User Sessions for Clinic Staff focused on Clinic Services topics
    - Scheduled start date 02/16/2026 – 04/10/2026
- EBT Offline/Online Card Transition Period: 04/01/2026 – 06/30/2026
- Go-Live Date: July 1, 2026

(Scheduling in progress for Texas State Staff for Information Management)

Training Materials

A comprehensive suite of training materials will be provided to support aspects of the learning experience and ensure participants have access to essential resources before, during and after the delivery of training sessions.

Training Materials for ILT and VILT Session Attendees

The following materials are in scope and will be printed and delivered to the customer:

1. **User Guides for Functionality**: Detailed printed (for onsite ILT sessions) and accessible in digital format, user guides are available to all trainees and end users, covering system navigation, common workflows, and step-by-step functionality. The following User Guides will be delivered:
    - Information Management User Guide
    - myWIC Shopping Administration User Guide
    - myWIC User Guide
    - Online EBT User Guide
2. **Quick Sheets/Job Aids**: Quick reference pages, printed (for onsite ILT sessions) and accessible in digital format, are available to all trainees and end users, and provide short/quick instructional support covering system navigation, common workflows, and step-by-step functionality.
3. **Recorded Webinars and End-to-End Process Videos**: Accessible in January 2026, these video resources are available for all end users regardless of topic areas or ILT/VILT session attendance. These resources are intended to help end users build background knowledge and understanding of new functionality before, during, and after attending training sessions.
4. **Training Agendas**: Clearly structured agendas for each session, outlining topics, start/end times, activities, breaks, and expected learning outcomes. Printed for onsite training sessions and provided in digital format to attendees of remote VILT sessions.
5. **WIC Mosaic Support Portal**: Online EBT page containing video content, structured Learning Paths and Readiness Resources for end users of both Information Management and Clinic Services CRM applications of the WIC Mosaic Solution.
6. **TtT Training PowerPoints:** Provided in digital format only for Train-the-Trainer participants.
7. **TtT Instructor Guides:** Provided in print/digital format only for Train-the-Trainer participants.

All materials, whether printed or digital, will be distributed to participants at the outset of training sessions and will remain available for ongoing reference to support continued learning and application in daily workflows.

Additional Support Materials

As part of the training material delivery, a suite of additional support resources will be provided to enhance and reinforce the learning experience. These resources are designed to assist users after training sessions, ensuring participants have ongoing access to essential guidance. These resources include microlearning and informational videos, release notes, and comprehensive knowledge base articles. Collectively, these materials will equip participants with the tools and information needed for effective application of training content in their daily roles.

1. **Knowledge Base Articles:** Articles, both new and updated, thoroughly documenting system operations and functionality for Information Management processes and Clinic Services – Online EBT new functionality.
2. **Microlearning and Informational Videos**: Concise, high-impact videos designed to reinforce key concepts, demonstrate system features, and address frequently asked questions.
3. **Recordings of Remote VILT Training Sessions**: Available for training session attendees to easily return to the session to review training content and demonstrations.
4. **FAQ Documents for Training Sessions**: The primary purpose of the FAQ document is to gather and organize all questions raised during training sessions. FAQ documents serve as a centralized resource for learners, enhancing understanding of new system features and clarifying complex topics.
5. **Release Notes:** Summaries of system updates, enhancements, and changes as they are released into WIC Mosaic production environments, release notes enable participants to stay informed about new and updated functionality.

**The Additional Support Materials listed above that are delivered will include/be inclusive of content and material that was previously delivered or updated as a part of the Phase 4 and Consortium projects.*

Evaluating Training Delivery & Training Materials

The Verdtek User Adoption Team will employ a combination of formal and informal evaluation methods throughout the duration of training delivery. By continuously assessing both the effectiveness of training sessions and participant learning, the team will adapt delivery approaches and update materials as needed within available timeframes. This ongoing evaluation ensures that end users are fully prepared for, and able to adopt, the new Online EBT functionality with confidence.

Conclusion

In summary, this comprehensive training plan is designed to empower participants with the knowledge, skills, and ongoing support necessary for success. By combining a diverse array of instructional materials with accessible, on-demand resources, we strive to ensure that all learners, regardless of experience level, are equipped to navigate new systems confidently and efficiently. Our multifaceted support structure fosters both immediate competence and long-term growth, enabling participants not only to adapt but to thrive in their daily roles. With these tools at hand, participants are well-positioned to translate training into meaningful, sustained performance improvements across the organization.
